Board of Trade Special Meeting

Blairmore Brewery Company Want
To Be Insured Against Damage
Cement Plant May Incur

A special meeting of the Blairmore Board of Trade was held in the council chamber at 9:30 on Wednesday night to consider some differences outstanding between the Keystone Cement Company and the Blairmore Brewing and Malting Company.

The Brewery Company wanted to hold the Cement Company liable for any damage that might occur to them through being menaced by dust from the proposed works. They stated that it was necessary in connection with the beer and malt manufacture to have vats and tanks so situated that they might be given any quantity of air, and that if such ventilation were installed it would be difficult to prevent dust getting into the vats or tanks. No expert advice could be obtained at this meeting, but the majority of those present were of opinion that judging by the distance the works would be from the brewery there was little or no chance of them proving a menace.

The Board was informed that three of the directors of the Keystone Cement Company were in town today trying to adjust matters with the Brewery Company. They claim to have several desirable locations in view, amongst them being Boy Island, where the presence of natural gas and other resources were sufficient to counterbalance the inducements offered them at Blairmore, and that the company were not altogether dependent upon Blairmore as a site for their proposed works.

It was therefore up to the people of Blairmore to endeavor and do all possible to secure the industry for this town, which was something that would mean an everlasting backbone to the labor giving resources and which no town with such opportunities right at hand as has the town of Blairmore could afford to let slip by.

The plant that the Keystone Cement Company propose to erect would be one of the finest manufacturing in the whole Dominion. The very latest type of electrical machinery would be installed, and the utilization of all dust in the manufacture of marketable materials would be prominent features.

After considerable discussion on the matter the secretary was authorized to forward the following lettergram to John George, director Keystone Cement Co., Lethbridge hotel, and a copy of same to be posted to the head office of the company at Calgary:

"That the Brewery officials can do nothing without consulting shareholders. This will delay matters about two weeks. Board of Trade suggests that you send particulars regarding capacity and scheme for disposal of dust in writing; also a statement of conditions under which you are prepared to

Wesley Church Sunday School Picnic Was a Grand Success

The Wesley church Sunday school picnic from Lethbridge to the Crow's Nest Lake on Thursday last was a thorough success and in fact the finest event of its kind yet held in Southern Alberta. Two trains started out from Lethbridge with some 800 people, who were added to by several hundreds from all along the line to Coleman. Passing through Blairmore the fifteen cars were packed to their fullest and in several cases some were crowded to the car roofs. The day was gloriously fine and conditions generally were all that could be expected after such a continuous rainfall as had been experienced in the mountains for some weeks past. Scores from all the towns in this locality attended the affair, and all report a most enjoyable time.

At The Sanatorium

The following guests registered at the Rocky Mountain Sanatorium during the week:

Sunday—Mr. and Mrs. A. M. Densmore, of Lundbreck; F. W. Russler, of Calgary.

Monday—N. A. Campbell, R. H. Groom and wife, Miss Myrtle Price and F. L. Barker, of Calgary; F. H. Scott, S. A. Frazer and B. Montgomery, of Pincher Creek; M. Newland of Macleod; C. H. S. Keith and A. Corrie, of Fernie; B. C. John McKeegan, of Coleman.

Tuesday—Mr. and Mrs. Goombs of Taber; Wm. M. Campbell and son Myrie, of Macleod; L. Ross-reiter, of Macleod; Wash; O. J. Jennings and A. G. Smith, of Calgary; A. H. McKewen, S. D. Peacock and Francis Aspinall, of Lethbridge.

Wednesday—D. Suits, of Calgary; John George, of Paulson, Sask.; W. J. Budd, of Calgary; W. M. Campbell, of Macleod.

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes M. E. Gebhardt, Oriole, Pa. There is nothing better. For sale by all dealers.

WANTED—A smart, industrious and intelligent boy, of 15 or 16 years of age, proficient at spelling, to learn the printing business. Good opportunity for right person. Apply to the office of the Blairmore Enterprise.

Archbishop McNeil, for many years connected with St. George's diocese, in Newfoundland, and for the past few years at Vancouver, B.C., has been called to the archbishopric of Toronto.

One of the most common ailments that hard working people are afflicted with is lame back. Apply Chamberlain's Liniment twice a day and massage the parts thoroughly at each application, and you will get quick relief. For sale by all dealers.

Locate plant in Blairmore.

Sgd. D. A. Sinclair, Pres.

T. B. George, Sec.-Treas.

The above message was forwarded same night and a reply is expected, upon which the Board will take action.

Among those present were D. A. Sinclair, president, W. A. Beebe, vice-pres., T. B. George, secretary-treas., A. A. Sparks, D. C. Drain, L. Dutil, W. Simpson, E. Morino and E. Treon. Meeting adjourned at 11:15 p.m.

Executives Hold A Joint Meeting

Need of Branch of The Lands Titles
Department in Southern Alberta
Is Being Strongly Agitated

On Wednesday night a joint meeting of the executives of the Coleman and Blairmore Boards of Trade was held in the council chamber at Coleman. Those present were H. G. Good-cove, president; Alex. Cameron, W. L. Oumette, E. Disney, O. E. S. Whitson and Percy Wil-mott, of the Coleman board; and D. A. Sinclair, president; W. A. Beebe, L. Dutil, T. B. George and W. J. Bartlett, of the Blairmore Board, as well as W. F. Stanley, editor of the Coleman Bulletin.

The object of the meeting was to receive certain proposals being put forward by the Lethbridge Board of Trade through their representative, Mr. J. G. McEwan. A letter was presented to the boards and read by Mr. Oumette, asking the co-operation of the different boards of trade towards decentralizing of the land titles office and urging the establishment of a branch in some central part of Southern Alberta.

Mr. McEwan explained very fully the object in view and the great inconvenience experienced at the present time through having to wait upon the overcrowded branches of Calgary or Edmonton, and the dire need of a branch in central southern Alberta to help facilitate the work of the land titles department. He stated that every judicial centre should possess a branch of the land titles department. The north had its centre in Edmonton, the mid-province in Calgary, and now it was necessary that the south should choose her central point. Mr. McEwan thought that taking all conditions into consideration Lethbridge was the most suitable location; but it was not required of any board that they specify any one point for the proposed centre. All was necessary was to place themselves on record as realizing the urgent need of a branch of this department somewhere in Southern Alberta.

Mr. Oumette asked if the associated boards of trade had taken any steps in the matter, and was informed that they had not, as far as the Lethbridge board were aware at the present time. The different boards were required to take the matter up individually and pass resolutions to forward the government agitating for the decentralization of the land titles office and establishment of a branch in the south.

As the meeting had been called on very short notice it was decided to defer the matter until the regular monthly meeting on Monday, August 5th, when in all probability a resolution will be passed by the Board.

The members of the Blairmore Board assured the Coleman board that the subject would be discussed at their regular monthly meeting to be held on Tuesday night, August 6th. The meeting adjourned at 8:45 p.m.

Editorial Notes

Vancouver papers report a
stringency in the money market
and other cities are somewhat
feeling the contagion. The
quarantine regulations should
be put in force at once, or the
plague is liable to reach out to
Alberta. Judging by reports
from some local collectors there
are already slight symptoms of
the disease of stringency in this
town, and some expert advice
will shortly be necessary to
cope with the financial problem.

A Blairmore gentleman, who
recently returned from Uncle
Sam's domain, informs us that
while he was in Chicago and
New York he was spotted as one
of the northwest bluffers. Such
is the quality of a north-
westerner in the estimation of
an easterner. Eastern folk will
not take it for granted that
conditions generally are two-
fold better in the west than in
the east, until they have made

up their minds to come west
and experience for themselves
but they cannot bring to mind
any one person who has ever
visited the west for labor or
speculation, who is at all pos-
sessive of energy or ability, who
has said that western condi-
tions are not superior. It's a
common command in the lower
provinces and the New England
States to say "Go west, young
man, and the thousands who

are taking the hint are proving
it to be a good one.

Erratum

The following errors occurred in
the report of the Blairmore public
school promotions in our issue of
July 18th:

In the promotions to D Class
Senior Grade 14, the thirteenth
name should have read Fred
Nichols, the given name having
been omitted in the former list.

In the promotions from Grade
VII (not VI) to VIII, those pro-
moted on Friday should have read
Arthur Ennis and Harry Vincent,
instead of Arthur Ennis and Ralph
Rosse.

A Beautiful Hanger

The hanger just issued by the
Edmonton Exhibition committee
is attracting considerable attention
and is really worth description.
The photograph of His Royal
Highness, the Duke of Connaught,
is used by special permission, this
being the only occasion on which
the Duke has allowed his photo-
graph to be used for advertising
purposes. Beside the Duke stands
Mayor Armstrong, of Edmonton.
Hon. R. L. Borden is easily recog-
nized at the extreme right, and be-
side him stands Hon. Duncan
Marshall, Minister of Agriculture
for Alberta. This hanger is recog-
nized as one of the most attractive
gotten out in Canada this year,
the coloring being good, and the
photographic reproductions excel-
lent. Copies will be furnished
free to anyone on application to
W. J. Stark, Manager, 625 Second
street Edmonton.

Body of Man Found

Near Pincher Creek

Pincher Creek, Alta., July 30.—The
body of a man, believed from papers
found in the clothing to be Robert
Ashbridge, of Kincardine, Ont., was
discovered in the South Fork of the
Old Man river, thirteen miles from
here. There were also letters from
friends in Scotland. He was likely
drowned three weeks ago in trying to
ford the river.

Happenings in and Around Blairmore

Charles Martin, of Winnipeg, is
spending a few days with Mr. and
Mrs. Frayer.

Miss Rita Latta, of Cowley,
spent several days with friends in
Blairmore and Coleman.

A. Wardman, of Lundbreck, was
a business visitor to Blairmore on
Saturday.

Quite a number of Blairmoreites
attended the boxing contest at
Bellevue on Saturday.

J. G. McEwan, executive mem-
ber of the Lethbridge board of
trade, was in town Wednesday.

E. Doucan, yard master of Win-
nipeg C.P.R., wife and daughter,
are spending a few days with
friends in town.

Andre Lucko, of New Michel, B.
C., was visiting his old friends in
town on Monday last, and re-
turned west on Tuesday.

Rennie Gresham, Annie McLeod
and Christina McLeod, being the
only students of Blairmore school
to write examinations, passed suc-
cessfully.

On Sunday next Rev. Fr. Sam-
mut will say Mass in Hilfest at
11 a.m. Evening service will be
held in Blairmore at 7.30.

The exterior of the new addition
to the Alberta hotel received a pri-
mal coat of paint last week, and
work on the interior will be rushed
to completion.

The members of Lethbridge Y.
M.C.A. are camped near Crow's
Nest Lake, where they are enjoying
mountain climbing, boating, fish-
ing, basking, etc., etc.

property of the undersigned.
Chain is initialed and engraved.
Finder will be rewarded by return-
ing same to J. A. McDonald, Blair-
more.

Mr. and Mrs. Emerson Allison

Pincher Creek, Mr. and Mrs. Mc-
ville, of Ontario, and Mrs. J. H.
Matheson, of Nova Scotia, visited
Mr. and Mrs. C. Hisecks during
the week.

The Blairmore Trading Com-
pany have removed their dry
goods into the western store of the
Hudd block, where they intend to
lay in a large stock of dry goods,
gentle furnishings, etc.

Rev. Maclean Beaton occupied
the pulpit of the Presbyterian
church on Sunday morning and
evening last. It is probable that
Mr. Beaton will be chosen to suc-
ceed Rev. A. S. Tod as pastor of
First Presbyterian church.

Mrs. Arthur Cheshire, who has
spent many months in the old
country, returned last week and
enjoyed a few days with friends in
Blairmore before proceeding to
join her husband at Princeton,
B.C.

An unusually good attendance
witnessed the moving pictures at
the opera house Saturday night
last. These pictures, which are
well put on and of a high charac-
ter, are proving a great source of
entertainment and enlightenment.

C. J. Northwood, of Robinson &
Little, Winnipeg, London, and
Montreal, spent the week with Mr.
and Mrs. R. M. Brisco, Mr. North-
wood was formerly a travelling
clerk of Mr. Brisco's out of Win-
nipeg.

A sale of assorted hand-made
Maltese lace will take place Sat-
urday afternoon at the Sanatorium
hotel. The beautiful patterns and
the perfect workmanship will cer-
tainly attract many of our ladies,
who are so much tempted by fine
lace.

The C.P.R. have a gang of men
at work erecting concrete breast-
work and bridge abutments at the
railway crossing over Lyon Creek.
These improvements were badly
needed, and will avoid any warn-
ings occurring there in the future.

The ball given at the opera house
Wednesday night by the electrical
workers of the Alberta Govern-

ment Telephoner, was a great suc-
cess. About two hundred lovers of
the art of terpsichore made their
appearance on the floor and all
report a most enjoyable affair.

E. T. Fitzsimmons, manager of
the Davenport Coal Company at
Burnin, was in town on Wednes-
day.

J. H. Lee and P. Patterson have
opened a real estate and insurance
office on Victoria Street between
Eighth and Ninth Avenues. See
their ad. in another column of this
paper.

The Altar Society ladies of the
Catholic church of Blairmore cordi-
ally invite their many friends at
the Sanatorium Hotel on Satur-
day afternoon. Refreshments will
be served for the benefit of their
church at the inauguration of the
new tennis ground.

W. J. Bodd, vice-president; John
George and D. Sutor, directors of
the Keystone Cement Company,
were in town Wednesday on busi-
ness in connection with the pro-
posed works in Blairmore. They
left on the night train for Leth-
bridge and Calgary.

A large attendance greeted
"Uncle Tom's Cabin" on Wednes-
day night, and were well pleased
with the performance. In the
forenoon the company held a free
street parade and the procession of
ponies, mules and human monkeys
attracted considerable interest.

A young man employed with
the Uncle Tom's Cabin Co., was
arrested by the police on Wednes-
day, acting on advice from Pincher
Creek. He was taken to Pincher
Creek to answer to the charge of
stealing several articles from par-
ties there, which articles were found
in his possession.

R. B. Mackay and H. P. Robin-
son, of the Canadian Bank of Com-
merce, Macleod; George Dedds,
teller of Bank of British North
America, Macleod, and R. B. Bart-
lett, of the Pioneer Furniture Co.,

Macleod, paid Blairmore a visit on
Sunday last and enjoyed a cruise
to the top of Goat Mountain to-
gether with Messrs. Dennison, Ir-
win, Crane, Drummond and Bart-
lett.

A. A. Sparks, proprietor of the
Cosmopolitan hotel, has decided to
put in a solid concrete sidewalk,
15 feet wide, in front of the new
hotel and eight feet wide fronting
on Sixth avenue. This will be
a great improvement and no
doubt others will take lik-
ing to the advanced step and
before very long the business
thoroughfare will be bounded
by a good stretch of solid concrete.

A couple of anglers from Cole-
man were brought before Justice
Gresham on Monday morning on
the charge of catching and having
in their possession fish that meas-
ured considerably under nine
inches in length. The fish were
produced as evidence by the R. N.
W.M.P., some of which were not
more than 3 or 4 inches in length.
The culprits were allowed to reim-
burse the treasury funds to the
tune of about \$40.

A. McLeod returned Monday
morning from an extended trip
through the great hubs of the
States, whether he had been trav-
elling on business in connection
with the Blairmore brewery. Mr.
McLeod also visited his brother,
Frank at Moose, Creek, Ontario,
where several days were spent. He
reports extreme heat throughout
Illinois and New York States, and
it was a pleasure to get back to
the tropical clime of The Crows'
Nest Pass.

A. A. Sparks was on Monday
nominated councillor to succeed J.
G. Smith, retired. The appoint-
ment of Mr. Sparks to the alder-
manship of Blairmore meets the
approval of every fair minded citi-
zen. Mr. Sparks is one of the
pioneer residents of the town and
during his long stay here has
proved to be an honorable and
capable citizen who will prove
possessor of all the qualifications
necessary for the conducting of
municipal affairs with fairness to
the town and its inhabitants.

BLAIRMORE VICTORIA STREET ALBERTA

The British steamer Manchester
inventor, from Montreal for Man-
chester, England, collided with a
submerged iceberg in the straits of
Helle Isle last week, and reached
St. John's, Nfld., where she will
receive repairs to her battered
compartments.

Mr. W. S. Gussalus, a farmer
living near Fleming, Pa., says he
has used Chamberlain's Colic, Cholera
and Diarrhoea Remedy in his family
for fourteen years, and that he has
found it to be an excellent remedy,
and takes pleasure in recommending
it. For sale by all dealers.

Beard's Camp Notes

There were no ladies' hats hung on trees on the Hog's Back for the past two Sundays, and the different millineries report the sale of two new hats since the last appearance in print of notes from Beard's Camp. Where there's a will there's a way.

Uncle Ned's latest discovery is that it was not the apples that drop the "poor" from off the Hog's Back a few Sundays ago, but "sparks" flying around, and ever hereafter, he hopes the sparks will concentrate the apples by being instrumental in driving them from such a blighted spot as is to be found in the recesses of the Hog's Back jungles.

The girls at the mansion have received invitations to attend the ball to be given in the Blairmore opera house by the electrical staff of the Alberta government. They are all struck on some of the "sensitive" "stuffed" and hope to improve upon them soon that unity is strength. Who said "loach"?

Uncle Ned is suffering from a severe cold contracted last week while decorating the mansion. He hopes to be able to resume his duties as spy of the Hog's Back next week. He says that all hats found hanging on the trees in future will be brought to the Blairmore millineries for identification, so in future someone is liable to shiver in their brown socks.

The fellow who gives his name to the Coleman Bulletin as "Dick Snugg" deserves commendation for admitting that his horse could travel more "an' two miles an hour." I seen that same horse pass by the camp here one Sunday last summer at really a trifle faster than a snail's gallop. Both "Dick" and the Blairmore treasury have my sympathy, as I know they both need the money.

At a meeting of the Fault Finding Club, held in the upper flat of the municipal exchange on Thursday evening, a resolution was passed to the effect that "Young ladies will have full liberty to in future traverse and otherwise make use of the by-paths and dark lanes around the Hog's Back, provided always they are in the custody of young gentlemen approved of or recommended by the mayor of the town."

We are pleased to become a member of the Order of Ginkgo, and will in future be recognized as being a promoter of all schemes, good, bad or indifferent. We trust that other members of this order will not become so deeply interested in their own localities as to forget that Beard's Camp is on the map. The boys are going to arrange to give the Blairmore members a big banquet in the near future, in the hope of finding someone among the legal bunch better looking than the soft skinned chap whom she was instrumental in importing into Western Canada from Nova Scotia. "There's something good in 'jilting' after all!"

The police patrol of the Hog's Back report finding a man by the name of Jean Cremo, sixty-five years of age, on the top of Goat Mountain Sunday afternoon. They claim that the old gentleman was anxious to get still higher up and only craved for a pillar of clouds to arrive from Lille or some other doomed city to pick him up and carry him, when people had higher notions than even members of the Canadian Alpine Club. Jean claims distinction as being the oldest man who has got approached the summit of Goat Mountain and issues a challenge to any other young chap born in the year 1847 to climb any of the peaks of the Rocky Mountain range.

Two gentlemen from a Blairmore office went to the Rocky Mountain Sanatorium for a sulphur bath on Saturday night. They claim to have been sixteen and eighteen pounds lighter respectively on Sunday morning when they attended church, where their company was very much appreciated. One big fellow stood up in church to give his testimony and claimed to have been "washed whiter than snow." He's certainly a liar, and the matter will be brought before the Fault Finding Club at their meeting Friday night, for we are certain that chap was not a bit whiter than the two "busts" who were washed on Saturday night, and the difference between their color and that of snow was like the comparison between a big swede and a nigger.

Central Baptist Church Anniversary

Rev. Douglas M. Thompson, of Fernie, B. C. will be the preacher next Sunday, Aug. 4th, at the Central Baptist church anniversary. He will preach both morning and evening. You are invited to be present to hear him.

On Monday evening, August 5th, the church will give a supper in the church building from 5:30 p.m. to 8 p.m., after which a varied and interesting programme will be given. The ministers of The Pass are invited to be present, and will give short addresses. There will be good music at both these occasions.

Notes From Burnis

Mr. Thon, blown left on the passenger Sunday night on a two-month's trip to the Land O' Cakes and Seones.

Mr. P. Paterson of the firm of Paterson & Lee, real estate agents of Blairmore, was a business visitor to town this week.

Geo. Coyle, representing the Wood-McNab Lumber company of Tri-Wood, was in town looking up business this week.

E. Marino has the foundation work of the new hotel well under way, but the work is being held up some on account of the scarcity of laborers.

The football game that was scheduled to take place on the 31st, at Blairmore, between Burnis and Blairmore, has been postponed until the 7th of August.

Mr. Githault, representing the Canadian General Supply company of Lethbridge, was in town this week in the interests of his firm.

A fishing party consisting of Messrs H. E. Riddle, J. Darbyshire, J. Skilling, J. C. Chester, W. Scott and W. Darbyshire camped out the week end on the South Fork of the Old Man River, and procured a nice catch of the speckled beauties.

Since our friend Mr. Stirling has had the tenacity to take a plant at proposed Frank Alpine proposition, we are looking for his very interesting report. Our president says it is liable to differ from all others, and he may have to appoint a committee himself to get at the bottom of things.

We regret that owing to extreme oneness of some of the Pass referees Bellevue had to walk off the field at Fernie in the round for the Muts cup. We are on very intimate terms with similar treatment. Who was the gallant fourth who said that Stan played a dirty game. Let him get up and tell us whether or not he has ever seen Stan injure anybody.

Mr. O'Brien having been detained on pressing business in Calgary, has not yet got the government to construct a bridge across the Old Man river at Burnis. We draw his attention to the pressing need, the execution of that which is still "in the hands of the Department."

Burnis wishes to seek contracts in connection with Borden's "extrins" also quote prices to catch the Blairmore and Snake when they get going again.

The weekly meeting of the Order of Ginkgo was held this week as per—

The Bellevue correspondent was brought up as a "trifler," but our worthy president knowing that all worthy institutions are liable to be credited with all sort of things, was tolerant, and on enquiry we found that Edith "Babbie" was actually in the head of the "Queen of the Woods," but the rider was thrown, consequently a likely winner was put on one side.

The meanness of the Hillcrest correspondent in reporting an attempted jump over the Lille train was mentioned by a member, but his tactics were voted as beneath contempt and not worth discussion.

Concern as to the whereabouts of the correspondent for Beaulieu Camp, was expressed, we hope to see a little more of his literary effort.

Members of the Order who fish the turbulent waters, are requested to produce the goods, when talking of the number and size of their catches.

The secretary was instructed to write Pincher Creek to ascertain if they had really struck oil.

Pulpwood Consumption

Increased 20 Per Cent.

The quantity of pulpwood manufactured in Canada in 1911 showed an increase of 73,801 cords (or 12.3 per cent) over 1910. In 1911, 672,288 cords were manufactured as compared with 598,487 cords in the previous year. The value of the wood also increased, with the result that the 1911 product brought to its vendors \$4,838,024, as compared with \$3,583,164 for 1910, an increase of \$1,254,860. The value of wood (\$6.45 per cord) was greater than it had been for years.

Of the total amount, Quebec consumed in its 28 mills 58 per cent.

Ontario used nearly one third of the total consumption, the province has the highest consumption per mill of any, 12,430 cords. New Brunswick mills were hampered by low water during the year. The consumption of pulpwood in these four mills was 45,834, over twice as much as in the depression of the previous year. Nova Scotia, where only mechanical process of pulp-making is used, in its seven mills consumed 22,221 cords of pulpwood. In British Columbia pulpwood manufacture was still in the experimental stage.

Quebec used four species of wood for pulp, namely, spruce, balsam fir (or balsam), hemlock and poplar. Ontario and Nova Scotia employed

spruce, balsam fir and poplar, while New Brunswick used spruce and balsam fir only.

Large Stool of Wheat

Lethbridge, July 28—One of the largest stools of wheat ever exhibited has been received at the International Dry-Farming Congress office. Dr. E. Harris of Cardston, Alberta, having 196 spikes. This enormous number of spikes is thought to establish a new world's record, for Doudlinger, a wheat authority, says that in the observations of experts only as many as 52 spikes have been observed in a single stool. There are other authorities, however, who credit the finding of 95 as possible, while Humboldt believed 70, which was found in a stool in Mexico was the limit. Pity, in his works, reported the finding of a stool of 100 spikes in 1800. He says that in 200 in Northern Africa and Italy, but Doudlinger, in commenting thereon says it is probable he was

seeing with the eyes of an enthusiastic.

This stool of wheat was pulled on July 1 from a field that seeded on August 1, 1911, and the whole field is the admiration of the farmers about Cardston. When this sample was pulled the wheat was fully 45 inches in height on the average.

This stool of wheat, and any others sent to the International Dry Farming Congress that merit it will be used in the decorative work of the Exposition next October.

Practicing Law With a Vim

D. H. Elton, of Lethbridge, spent Friday last in town and was a welcome visitor at the Echo office. Brother Elton is secretary of the Alberta and Eastern British Columbia Press Association. He works industriously for that organization 365 days a year; the rest of the time he puts in at the

Lake City

Is the name of the Western Terminal Point of the proposed
Crow's Nest Pass Electric Railway and is already tapped
by the Pass line of the C. P. R., while the G. N. R. has already
approached to within a few score of miles and must
eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few
miles east of the provincial boundary between Alberta and
British Columbia, and just north of the international line.
In reality, it is at the top of Canada where the majestic
Rockies tower in serene magnificence over great chasms and
numerous fords, reflecting their presence on the waters of
this beautiful lake. Here also are afforded the very best
tasks for the daring mountain climber and for huntsman
who desires to outlive the quiet ways of the Rocky Mountain
goat, sheep, deer or elk, which are the monarchy thereon.
In close proximity are numerous timber, mineral and fuel
resources, development of which is now in its initial stages.
These resources include gold, quartz, coal, iron and pulp wood.
Crow's Nest Lake has long been looked upon with promise
as an admirable location for health and tourist resorts, and
but now this promise is being realized. Plans for hotels, etc.
are being arranged, as well as boat houses, and the most
modern pleasure yaws will soon glide over the surface of
this beautiful lake.

But a few weeks ago lots were placed on the market, and
the agents have had their hands full attending to purchasers.
Prices run from \$150 up. For further particulars
apply to the agents

THE AUSTRALIAN BLACK.

Stories of Ill-Treatment by Whites.

Statements have been published from time to time both in Australia and the Mother Country containing sweeping allegations of ill-treatment of the aborigines by white men resident in the outlying parts of the Commonwealth. The following statement, in this question is made in The Sydney Morning Herald by two of the pioneer pastoralists of North-Western Australia—Mr. F. B. Wittenoom and Mr. Straker. Their characterizations are as follows as both untrue and unjust.

"There may in the past have been isolated instances of cruelty, just as there are anywhere else," Mr. Wittenoom said, "but I, because I saw a drunken man beating his wife in Sydney, I went to go away and say that here all men get drunk and beat their wives, what would you think of me? Just the same as I talk of those people who tell these stories about us because they have seen or heard of some one up in the bush who has treated the blacks badly."

Mr. Straker remarked that in the Kimberley district of Western Australia there were immense tracts eminently adapted for grazing, but they had never been used for that purpose because the blacks were so troublesome. They were so pampered by the Government nowadays that there was no doing anything with them. In his district (Roebourne), they had not, the same trouble, and he accounted for it, the stations had, as he put it, absorbed and utilized them. He said that the blacks had killed off the native game, and so forced the blacks to spear stock in order to provide themselves with food for the stations, and because the settlers had waged a war of extermination against the blacks, the natural enemy of the native game. The blacks were dying off in the northwest as in other parts, the decrease being more rapid than in the goldfields had been opened up, disease then becoming a factor among them.

Mr. Wittenoom said that it cost him a large amount of money to provide for the blacks on his properties. His main station had fed 40 blacks daily, old men, young men, girls, and children, and of that number only about ten were required to do any work. It was quite a mistake to suppose that a station-owner got cheap labor by utilizing the blacks. In order to keep a good boy, a station-owner had to keep all his relatives as well. They were not paid for money, because money would be of no use to them, but they got all they required, and little luxuries were associated with them. In his latest annual report the chief protector of Aborigines in Western Australia, Mr. G. A. G. G. G. I made a lengthy visit throughout the East and West Kimberley. I question in all its many phases. I traveled over about 2,000 miles of the country, and I am pleased to report that the general conditions existing between black and white are, with the exception of deplorable little by bush natives, on the whole satisfactory. Reports have been received from all parts of the state, and it is pleasing to note that the general tone of the reports confirm my own observations.

Lucky Speculation.

A certain citizen of Montreal, it is said, wrote to his agent in London to purchase a ton of copper for him; but the letter being one of the worst specimens of penmanship, as well as perhaps not very correct in point of orthography, the agent read the order "a ton of copper." Surprised at such an order, but nevertheless anxious to oblige his correspondent, he immediately set to work, and bought up the commodity in all quarters till he had the requisite amount. This, as may be imagined, was at

tended with the very natural effect of creating a demand for copper (in the language of the trade, copper came to be inquired after), and also of rendering them scarce, so that they in consequence rose very much in price. He spent now wrote his correspondent that he had had great difficulty in fulfilling his order, but that he had succeeded in procuring for him a ton of copper; but that copper had since risen very much in price, and if he chose to sell he had now an opportunity of realizing a handsome gain on the transaction.

The Montreal citizen, as might be expected, was very much astonished in his turn by the communication, and the manner in which his order had been fulfilled, but had the good sense to write immediately to sell by all means; and thus, it is stated, pocketed a considerable sum from an unintentional speculation and unexpected advantage.

When the Ostrich Hurries.

Two of the usual stories of an ostrich when it walks, but when the bird is alarmed and commences to run it exchanges its mincing stride for a full gallop, and it is really carried off over the ground at a rate of twenty-five miles an hour. Ordinarily an ostrich will trot at a rate of four feet a stride, for it seems to be one of the rules of nature that birds like ostriches, flamingoes and cranes extend their stride only when alarmed. The ostrich when it runs takes both feet off the ground at every stride, its progress being made by means of a series of jumps so rapidly performed that the observer under the impression that one foot remains on the ground until the other is placed.

Caprioli and the Kaiser.

Gen Caprioli, a stolid, rumbling kind of man, with much sound sense and some kindness of heart, received a message from the emperor one day that he was to dine with him, and went to his imperial master at once, when the following conversation took place: "I want you," said William II, "to take Bismarck's two places as chancellor and Prussian Prime Minister." "I am at your majesty's orders," answered the general. "Have you no conditions to make?" "I have for me, sire, to make conditions." "Very well. Come here to-morrow morning. What are you going to do now?" "I shall go home and finish my dinner, sire." A very good, solidly answered.

An Extraordinary Rat.

The Canadian sand rat is distinguished by a solid, tumbling kind of man, with much sound sense and some kindness of heart, received a message from the emperor one day that he was to dine with him, and went to his imperial master at once, when the following conversation took place: "I want you," said William II, "to take Bismarck's two places as chancellor and Prussian Prime Minister." "I am at your majesty's orders," answered the general. "Have you no conditions to make?" "I have for me, sire, to make conditions." "Very well. Come here to-morrow morning. What are you going to do now?" "I shall go home and finish my dinner, sire." A very good, solidly answered.

All Records Broken.

All previous immigration records for Ontario have been broken by the tide of immigration that poured in during May. The Government immigration office has so far this month distributed about four thousand immigrants throughout Ontario. This is nearly four times as many immigrants for this province as for the first fifteen days of May last year.

Gravitation.

Which would drop to the ground first, a bullet fired from a gun held perfectly level or one dropped from the hand from the same height and at the same time? They would strike the ground at the same time if the cannon is perpendicular to a plumb line, the firing and dropping to be at absolutely the same instant of time.

Catty.

Just you should have seen the handsome chap who came and kissed me from the car window. Bessie—Express or local? Bessie—Express. Why Bessie—I understand.

Degrees of Love.

"That prima donna must love music thoroughly." "Oh, I don't know," replied the manager. "She doesn't seem to get a bit of pleasure out of hearing any other else sing well."

Slam is in Distress.

Slam is in distress because the rice crop will be only 40 per cent of the normal yield. Dysentery corrodes the intestines and speedsily eats away the lining, bringing about dangerous conditions that may cause death. Dr. J. C. Kellogg's Dysentery-Cordial clears the intestinal canal of the germs that cause the inflammation, and by protecting the lining from further ravages restores them to healthy condition. Those subjects to dysentery should not be without this simple yet powerful remedy.

Cited an Exception.

A religious woman, while visiting Western town, gave a "Talk for Men," during the course of which he expressed his conviction that no young man should feel justified in taking his own sister. "Is there any young man present who thinks one can safely disregard this wise rule?" asked the speaker. Whereupon a youth in the rear of the hall stood up and said in a loud stentorian tone:— Yes, sir, I do. And what, sir, demanded the angry and surprised speaker, is the place which you yourself would think of visiting to which you could not take your sister? The barber's shop, replied the youth.

THE ENTERPRISE, BLAIRMORE, ALTA.

How Rome Was Saved
How are you on ancient history, inquired the Wood street man.
Fine, declared the sage of Smithfield Street. Ask me anything you want to know.
I was going to recall the facts about those geese that cackled and thus saved Rome.
I remember the episode. You see Rome was a very rich city in ancient days, filled with gold, and precious stones. Some invaders had gathered in of hopes of getting big loot.

But when they heard the geese cackling they thought they'd better grab the geese and let the gold go. The cost of buying was just as high then as it is now.
I comprehend.
They made off with the geese and thus Rome was saved.

Sand Songs in the Desert
In the North African desert at some times in the year a curious phenomenon can be heard.

It is the song of the sands. No one can say whence this song comes, but it is due to atmospheric conditions. There are two distinct sounds: one is a low, mellow, and rather plaintive note like the after-reverberation of a big striking clock. The other is a high, shrill, and rather harsh note, like the "song of the sands" can be heard some of the sand dunes when trodden on give out a hollow, rattling sound, and when the surface of the desert is covered with sandstone a tinkling noise is heard which is trodden on—London Answers.

With characteristic thoroughness the German have devised a real burglar proof safe, so cleverly designed that it will baffles even the burglars who work with the aid of oxygen and acetylene blowpipes. It is called the carousel, or "roundabout," and is made of a material which is a mixture of the two strains.

Small dogs, such as fox terriers are a rarity in Alaska, for in that country a dog is valuable in the proportion to the amount he can pull. A sleigh dog will weigh anything from 30 to 150 pounds, the average being about 65 pounds.

They get a variety of foods, including rice, raw, corn meal, and fish. If rice or corn meal forms a part of their food it must be cooked. Some men prefer to feed their dogs on beef or fish, thus doing away with cooking.

The Yukon sled, while not a thing of beauty is built to stand all kinds of hard wear. The sled is about four feet long, is made of any kind of hard wood, lies close to the ground, costs from \$10 to \$14, and makes a trail 14 inches in width. Another pattern is known as the basket sled and is to the Yukon sled what a three-masted schooner is to a corvette. In length it is from eight to fifteen feet, is made of birch, oak, or hickory, cuts a trail 22 inches wide, with costs from \$40 to \$200, in.

Hold Her Audience Well
Diggs—My wife is a wonderful vocalist. Why, I have known her to hold her own for hours.
Gibbs—Get out!
Diggs—After which she would lay it in the cradle and rock it to sleep.

A Real Meat Baby
Small Heasle did not like to see her new baby brother for the first time.
How do you like him, asked papa.
I liked of lavender dots, and I'm glad we've got a real meat one at last.

A Successful Hunter
Ben hunting?
Yes.
Kop—Any thing?
Kop—couldn't get a guide to go with me.

Where He Must Fall
I believe the man who loves deep thought can eventually accomplish any thing within human possibilities.
No. There's one thing within human possibilities that he can't do.
That, if I may ask?
Keep from seeming ridiculous to other people.

The Kaiser's Daughter
Before setting out for Vienna and Venice, William II, Emperor of Germany, awaited at Berlin for his daughter, whom he calls his "best boy." She returned from Switzerland, where she made, according to the official version, a sojourn for her health. The gossip of the German court says this was really a lark to escape from the presence of the Grand Duke of Weckenburg-Stretita, to whom they wish to marry her without her consent. The Emperor and Empress were the station when she arrived. Hardly had the train stopped when the Princess hastily descended from the coach, and throwing herself impulsively into the arms of her father exclaimed: "I will not marry him!" The Emperor, smiling magnanimously, replied: "I shall occupy myself with this alliance after the others."

The Post
The poet sang of sparkling rills And bursting buds, and country lanes And violets and daffodils And sweet, refreshing April rains, All nuffed up and having child, And doped with seven kinds of pills. He sat where smoke and fog were thick, And looking from his window where It furnished little light or air, And saw but a wall composed of brick, And as he looked air-as he wrote A lump rose in the poet's throat, Unless I sell this mighty quick, I fear, he said beneath his breath That I am doomed to starve to death. Therefore the poet wrote away, Of promises that spring futility, And bravely let his fancy stray To glaucous over distant hills.

Some Reports
Scotting Man—Of course, our suffragettes ought to live in those European countries where women and donkeys hitched together draw heavy loads. There you'd be of some use. Suffragette—Are you married?
Scotting Man—Of course, I am. Suffragette—Evidently the custom you mention is not confined to foreign countries—Judge.

He Did
Napper—Jones is so visionary! No body takes any stock in his schemes. Snapper (glumly)—I did—of wild.

Do you think it is possible to make an airship absolutely safe?
Sure, replied the mechanician.
How?
Disable it before it gets a chance to leave the ground—Washington Star.

They Don't Speak Now
What nonsense all this is about men getting on their knees when they propose to Mrs. Parlow, to be "near I friend." My husband don't do any such absurd thing.

He Did
He did when he proposed to me. He said "Dear friend, without thinking I propose to you."

In the Growth of Corn

there's a period when the kernels are plumped out with a vegetable milk, most nutritious. As the corn ripens the "milk" hardens, and finally becomes all most starchy.

Post Toasties

Are made from this hard part of choice selected corn. It is carefully cooked; treated with sugar and salt; rolled into thin bits; then toasted to an appetizing brown—without a hand touching the food.

It has been said that Post Toasties are the most delicious food yet produced. One can render an opinion upon that.

"The Memory Liners" SOLD BY GROCERS

Made by Canadian Food Cereal Company, Ltd., Windsor, Ontario, Canada.

They Make Good
who keep themselves in fine physical condition. Regular bowels, active kidneys and liver, good digestion, and a greater natural vigor follow the timely use of the reliable **BEECHAM'S PILLS**

WOMAN'S TRIAL
The lightest of all pills to take, and the most effective. It is a perfect remedy for all female ailments, and is the only one that can be taken without causing any harm to the system. It is the only one that can be taken without causing any harm to the system. It is the only one that can be taken without causing any harm to the system.

Standard Gas Engine Oil
gives the best lubrication possible, alike in kerosene, gasoline and gas engines. Keeps its body at high temperatures. Equally good for external bearings.

Mica Axle Grease
saves power and fuel in your tractors. The best known, most liked axle grease made. Never rubs off. Never gums.

Silver Star Engine Kerosene Oil Gasoline
Yes, but I used her sickle to do it with, and she was the best of it. Catholic Standard and Times.

Granite Harvester Oil—The short cut oil, specially prepared for use on reapers, binders and threshers. Greatly reduces friction and wear. Body not affected by moisture or change of climate.

Capitol Cylinder Oil—The very best oil for steam plants on the farm. Lasts longer and gets more power from the engine, with less wear, than any cheap substitutes; costs less in the end.

Atlantic Red Engine Oil—Strongly recommended for slow and medium speed engines and machinery. Eases the bearings and lightens the load.

The Imperial Oil Company, Limited

Because they act as gently (no purging or griping) yet so thoroughly.

DR. CHASE'S NADRUOX CATHARTICS

Are best for the children as well as the grown-up. 25c. a box at your druggist's.

Cutting Trees by Wire

A new method of felling trees by the friction of a steel wire, which is able to work its way through a 20-inch tree in about six minutes, is putting the axeman out of business in the forests of Germany.

The wire is drawn rapidly about the tree and the heat generated by the friction is sufficient to burn a thin carbonized kerf, which is both smooth and cleaner than the cut of a saw. The charcoal layer adhering to the trunk is extremely thin, and allows the structure and any disease of the wood to be distinctly recognized. It enables the tree to be worked with chalk, and at the same time serves to preserve any trunk that may be left temporarily in the woods. There are many advantages in this method, notably in waste, decreased labor, absence of all apparatus usually required, and the machine can be used in close quarters not sufficient for men choppers.

If the new German plan should be generally adopted, the tree cut close to the ground, it would mean the saving of a great amount of lumber that is now wasted—Portland Express.

A mad dog bit my landlady.
How do you know he was mad?
Diane? I say he bit my landlady—Satire.

A SLUGGISH TORPID LIVER

LEAVES BILE AND OTHER POISONOUS IMPURITIES IN THE BLOOD

The Whole System is Cleaned and Invigorated by

DR. CHASE'S KIDNEY-LIVER PILLS

Let the liver get sluggish and torpid and there is trouble with all the vital organs.

The tongue is coated, the head aches, digestion fails, there is fullness, fermentation, flatulency in the stomach. The bowels are constipated and loose by turns. Even the skin tells of the poisoned state of the system by pimples, blotches and liver spots.

The action of the liver must be awakened, and nothing can accomplish this so quickly and so certainly as Dr. Chase's Kidney-Liver Pills. It is through the liver and kidneys alone that the blood can be freed of all its impurities and the morbid matter which collects there when the liver is torpid.

Many a suffering man and many a dependent woman have been cured of liver complaint and kidney derangement by Dr. Chase's Kidney-Liver Pills. By their direct and combined action on both liver and kidneys they have often proved successful where other kidney medicines have failed.

Backache, Kidney Disease, Liver Complaint, Chronic Indigestion and Constipation are thoroughly cured by Dr. Chase's Kidney-Liver Pills. One pill a day, 25c. a box, at all dealers or Edmandson, Bates & Co., Limited, Toronto.

The Young Wife's Complaint

I wish to complain, said the bride laughingly, about that flour you sold me. It was tough.

Tough, wasn't it? said the grocer. Yes, though. I made a pile with it and my husband could hardly cut it.

British imports of hops about half of which come from the United States reached \$2,835,000 worth last year, against \$2,835,000 in 1910 and \$3,350,000 in 1909.

Mormon missionary work in Japan was commenced in 1909 and the new has his churches in Tokio, Sagami, Kofu and Osaka, says the Associated Press of Tokio. There are fifteen missionaries with a total of forty-five converts, and the members of the church in Tokio number fifteen.

Results from government surveys, women, the Government service, teachers, and students of middle schools, commercial clerks, telephone girls, etc.

Why did you fire that belly from the National Guard?

Every time the captain said "Front" he jumped from the ranks and held out his hand for a key.

DOODS KIDNEY PILLS

W. N. U. 902

STARTLING PREDICTION

Sir William Ramsay Thinks Coal Miners May Soon be Unnecessary

Sir William Ramsay, the eminent scientist, in a speech at the opening of the International Smoke Abatement Exhibition at the Agricultural Hall, made the startling prediction that he might be able in the future to do without coal miners.

Explaining how he pointed out that salt was mined by introducing water down the shafts of the salt mines, the water being pumped back in the shape of brine and the salt recovered by evaporation. He had carefully considered the coal industry from this standpoint, and had seriously come to the conclusion that no coal need be burnt for ordinary purposes. The ideal state of things would be to have the retorts in the bowels of the earth. What was to hinder the coal being left where it was he asked.

The gas might be obtained by passing down the boring, the necessary air to produce the gas being introduced in this way water-gas, which was a mixture of carbonic oxide and hydrogen, could be produced on the surface of the earth and could then be employed for every purpose for which coal is used. Sir William Ramsay added that electricity might be distributed where it was needed at such a small cost that it could be used for heating. At present it was expensive but there was no reason why in future it should not cost one-hundredth part of a penny per unit.

Later, as one of the guests of the Institute of Printers and Kindred Trades at their annual dinner, Sir William made the highly interesting statement that he had been in communication with a certain colliery proprietor, who had decided to give him an opportunity of making an experiment he had suggested. The experiment would be on a small scale, but, if it proved successful, it would be large enough to light a candle with, in the words of Bishop Ridley would not be put out in our time.

It Has Many Qualities—The man would have a head of Dr. Thomas Electric Oil is armed against many ills. It will cure a cough, break a cold, relieve a headache, and will reduce the swelling from a sprain, cure the most persistent sore and will soothe all cuts and contusions. It is a medicine chest in itself, and can be got for a quarter of a dollar.

Slamming Elephants

Slam is pre-eminently the land of animals and not a few of these which pass and repass in the course of the day's work. Keep the new arrival waiting to hear a steam locomotive puffing the countryside that a circus is in town. There goes the sacred Indian bull, and a few minutes later the charge of two small boys, down into the river, and a few minutes later the charge of two small boys, down into the river, and a few minutes later the charge of two small boys, down into the river.

Two of these splendid animals were seen at the circus, which was recently erected at Nanaimo. The elephant, which was looked upon with great veneration by the natives, was the only one of its kind in the colony. It was a large, powerful animal, and its ponderous strength is daily used in his master's service. It is not that the elephant is a creature of burden. Lucky is that elephant which is born an albino; for he shall live long and be well treated. He is pampered, and he shall do no work at all. He is a creature of burden, and his lighter grey than his relatives may attain to greatness. Only a few elephants are born albino, and they are highly prized. One of the albino elephants that was shipped from the great city of London to the King at Bangkok, and the elephant was a small and small in the jungle, and he was a small and small in the jungle, and he was a small and small in the jungle.

Plodder is looking pale. He's just killed himself with hard work. What's he engaged at? Inventing a labor-saving machine. Puck.

WELL POSTED

A California Doctor With 40 Years Experience

"In my 40 years' experience as a teacher and practitioner along hygienic lines," says a Los Angeles physician, "I have never found a food to compare with Grape-Nuts for the benefit of the general health of all classes of people."

"I have recommended Grape-Nuts for a number of years to patients with the greatest success and every year's experience makes me more enthusiastic regarding its use."

"I make it a rule to always recommend Grape-Nuts and Postum to place of coffee, when giving my patients instructions as to diet for I know both Grape-Nuts and Postum can be digested by anyone."

"As for myself, when engaged in much mental work my diet twice a day consists of Grape-Nuts and rich cream. I find it just what I need to put me in good working order."

"In addition to its wonderful effects on a brain and nerve food Grape-Nuts always keeps the digestive organs in perfect healthy tone."

HEALTH IN THE FARM HOME

Written Expressly for Dry-Farming, See Sir George P. Stewart, D.O., Leithbridge, Alberta.

The old adage "an ounce of prevention is worth a pound of cure" is verified on the subject of health. Two of the most inexpensive means to be used toward this end are fresh air and proper digestion.

Residents of the country sometimes get the idea that because their work frequently takes them out doors for a few moments at a time, they do not require to attend to the ventilation of the house, but this is not the case. Never neglect to get a good circulation of fresh air through the rooms you live in three or four times a day, and by all means have the sleeping rooms well ventilated—windows open in the summer and always part way open in cold weather.

These individuals who are afraid of fresh air in their sleeping rooms deprive themselves of the very first principle of health. Have fresh air coming in through the windows, two windows, have both open; if but one window, open it and leave the door ajar, being careful to place the bed where there will be no draught. But should you be so situated that you cannot leave the door open, then open the window from both top and bottom, as this will assure a better circulation of air. A hundred times rather spend a little more on fuel if necessary than have dealer bills for doctor's care, and remember that a living room or office for the summer, if no verandah, put down a window blind or two, and you will be ground at a convenient and shady place outside the house and practically free from the heat of the sun.

But in this outdoor living room you must have a screen fitted over the window, which will rest on a table or other flat surface under your feet, so that you can place your vegetables, fruit, and other things on the table, to prevent flies from lighting on the same. Should the fly come near your worst enemy, as it is a disease carrier, I wish to mention here that it is the strictest economy to get screens for your doors and windows, so you will be able to keep your house free from flies. Never allow your verandah to be poured near this outdoor living room, or your refuse to be thrown around, as these things may become productive of germ-borne diseases.

What is even much better than open windows for the sleeping room is to enclose the verandah with a canvas and move your bed out there; or put a floor on a derrick of your lawn and pitch a tent so it can be opened for ventilation. You will have people say that the heat of those who sleep in closed rooms are and perfectly well. This may possibly be true in the case of individuals with strong constitutions, but for one of these we could point to scores who are all right and who could recover their health by the fresh air treatment.

Another factor in the cause of disease is in no small number of cases rapid diet. Digestive trouble of various kinds are very prevalent in this country. Rush is one of the chief causes of this in this American continent. It is not alone found in business, but even in the home, where the family is the table. They do not take time to properly masticate the food they eat. They come to the table tired and eat the food hurriedly without masticating it as they should, and the result is indigestion or later on, followed by various other maladies. The food taken is often blamed when it is due to the way it is eaten and not to the food itself.

It is infinitely more difficult to regain health after it has been undermined than it would be to maintain a state of health by obeying the laws of health.

Your stomach will take considerable abuse without protest; in fact it is often a very unobedient condition before it rebels and its owner becomes aware of the trouble he or she has brought upon himself or herself.

In eating too hurriedly you are apt to overeat, inasmuch as the hunger is not appeased as it is when the food eaten is properly masticated, in which case it is more easily and more perfectly digested, thus furnishing more nourishment for the body.

The Old clock of St. Giles

All loyal Scotsmen will learn with regret that the well-known clock of St. Giles' Tower in Edinburgh, which must have told the time to Scott and Burns, is doomed to disappear. Apparently a workman fell through the case and damaged the mechanism so badly that the clock authorities do not consider the worn out works worth repair. So the old clock will be handed over to the City Museum and replaced by an invaluable timepiece, without hands or face, which will merely strike the hours, and leave the aesthetic effect of the tower unspoiled.

The ancient clock of St. Giles has seen two centuries of service, but is more rickety youth compared with some of the mediæval horologes on English cathedrals. There are clocks that date from the fourteenth century at Exeter, Wells and Peterborough—Westminster Palace.

Stubborn Wife—My husband is not well. I'm afraid he'll give up. Wife's Mother—Well, he may give up. He certainly never gives up. Toronto Topics.

FROST & WOOD

Mowers and Rakes are strain and time proof. Stipple, positive in action and strong.

LOW COMPANY LIMITED

COMES FROM NOVA SCOTIA THIS TIME

ANOTHER SPLENDID CURE BY DODD'S KIDNEY PILLS

R. Moulaison, whom two Doctors treated, finds relief and permanent cure in Dodd's Kidney Pills.

Surette Island, Yarmouth Co., N.S. (Special).—Mr. Renie Moulaison, a well known resident here, is telling his neighbors of his cure from a severe attack of Kidney Disease which kept him in a state of pain and suspense for two months and defied the efforts of two doctors who were treating him.

"My trouble started with a cold," Mr. Moulaison says. "My muscles would cramp and I had backache and dizzy spells. My head ached, and I had a tired, nervous feeling which was light flashed in front of my eyes."

"I suffered in this way for over two months and was treated by two doctors, but they didn't seem to be able to do much for me. Then I started to take Dodd's Kidney Pills and they helped me almost at once. Six boxes cured me."

Dodd's Kidney Pills always cure the kidneys. Cured Kidneys strain all the impurities out of the blood. That makes pure blood and good health.

Mrs. A.—Are you troubled much in your neighborhood with borrowing? Mrs. B. (innocently)—Yes, a good deal. I don't seem to be able to have anything I want.

Desert, if I were far, far away, oh, you love me! Why, Reggie, what a question! I'm sure the farther you were away the better I should love you.

The new cook came out and did very well her first morning at Londonville. She did so well that she was the head of the house.

How early must I get up in the morning? Well, said Mr. Subbubs, the first thing for the city leaves here at 8:30. You'll have to get up about 6 if you want to make that—Washington Herald.

An Always Ready Pill—To those of regular habits medicine is of little concern, but the great majority of men are not of regular habit. The worry and cares of business prevent it, and out of the irregularity of life comes dyspepsia, indigestion, liver and kidney troubles, and a host of other ailments. The new system demands a corrective and there is none better than Parmenter's Vegetable Pills. They are simple in their composition and can be taken by the most delicately constituted.

Peat—Do you think the day will come when there will be no coal left on earth? Parker—Well, it won't be our coal's fault if it doesn't—Life.

Minard's Liniment used by Physicians

You mean to say a horrid story the marble clock from the mantle with the cog in the room? Yes, but you see the cog is only a watchdog the little deer—Life.

London reports that the fashion of this extraordinary variety of head covering was known in Florence toward the end of the eighteenth century, but its growth in popularity did not begin until 1825, when its manufacture was begun in France.

The Chinese believe that evil spirits are able to move only in straight lines, and that they cannot penetrate through solid matter; therefore the problem of keeping them out of a dwelling or a garden seems to them a simple matter—Chicago News.

The Sultan's Palace

The Moorish palace of Sultan Abu Yakub Yusuf at Seville—known to-day as the "Alcazar"—contains one of the most elaborate practical jokes extant. When a gay mood some important merchant or notable of Seville would receive a pressing invitation summoning him to the presence. In a fever of delighted expectancy the fattened guest would don his whitest raiment and his him to the palace. There he would be ceremoniously conducted to the gardens and directed up the long avenue. Half way up it he would inevitably tread upon a moving dagbato resting upon a spring, and immediately fine jets of water would gush out of the ground and from the surrounding shrubbery and drench him. Amid the jeers of the courtiers the luckless guest would be obliged to beat an undignified retreat. Before he was allowed to leave the palace, however, he was sworn to secrecy on pain of death. At all costs nothing must make the joke fall flat when repeated. But what I had been on the water-couple of hours the motor went wrong and—

Force of Habit He had a motor-car, but he also wanted a motor-bus, and so he bought one. He had a day's tuition at one of those places where they guarantee to teach you anything in twenty-four hours, and then went on a trial trip alone.

It was late when he returned home. He came in by the back way. His clothes were wet and his hair hanging over his ears in strings. John! exclaimed his wife. What on earth—

It's all right, Mary, he assured her. I didn't expect. Everything's all right. But what I had been on the water-couple of hours the motor went wrong and—

Well, before I—realized it I was over the ride and trying to get under the couloinment that fit it.

He Knew

It isn't the size of the gift but the spirit that goes with it that counts, she said softly.

Who is going to get a twenty-five cent present from us now? asked her husband promptly.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying the best of remedies—Mother's Own Worm Exterminator.

Dick—What part of the family tree am I, muzz? Mother—I guess you are one of the limbs, Dick.

Dick—Do you suppose that's what meant this morning when he said that I ought to be trimmed about every so often?—Judge.

The Fan's Mistake

Marie—Did she sue him for breach of promise? Marie—Yes, the poor fan spoke of diamond and she said it was so sud den.

Happenings in and Around Hillcrest

Great interest is taken by local football men in the match that is to be played at Blairmore August 7th, between Burnis and Blairmore. "May the best team win" is the hope of all, and we hope they do.

The coal company at Hillcrest are rapidly approaching the thousand ton a day mark. The mine is working full force and the work being done is principally all development work, but by the output is increasing day by day and it will not be long before the shipments from Hillcrest will make all the other mines along the Pass green with envy.

John Brown has taken advantage of the fine weather we are now having and has gone for a few days' fishing at the North Fork. Mr. Brown is a fisherman of no mean ability, his reputation in this respect being second to none in The Pass, and a big fry is expected when he returns. That the fish will be the real article is certain, for there are no fish shops at which one can call in The Pass.

Another well known Hillcrest sportsman, William Adlam, is making trip to the same locality this week. No sports water is being taken along, so Billy expects to have a fine week's sport. His proposed big game hunt to take place this fall will, if successful, be a harbinger of no mean ability, his reputation in this respect being second to none in The Pass, and a big fry is expected when he returns. That the fish will be the real article is certain, for there are no fish shops at which one can call in The Pass.

The game played at Hillcrest between the Bellevue and Hillcrest football teams drew a large crowd of spectators from the two towns. The game was a very friendly one, neither team putting up the game that was expected of them, but at the same time playing to win. Bellevue showed much less confidence than they did earlier in the season, and Hillcrest were a long way behind their usual form, but this slackness was probably due to the fact that nothing depended on the game but the pleasure of playing a little liquid refreshment. The ball ought to have been turned over to the juniors some time ago, so no wonder in condition, while the field upon which the game was played was not in the state it should have been for a good game. The feature of the game was the brilliant game put up by "Casey" Jones (said to have been the one who had been at Burnis Hill) and the fact was the more marked on account of the slowness of the majority of the other players. Since the game Bellevue has made several attempts to enlist his playing powers for that team in the fight for the Mackay, but in spite of the tempting offers made him Casey is true to Hillcrest.

Appropos of the discovery of a new animal in the fastnesses of the Rocky Mountains we notice the C.P.R. has obligingly placed a box car at the point nearest its haunts to accommodate the numerous parties of naturalists and other curious people who are taking trips in to investigate for themselves. The Guanaco is peculiar to the mountains of Southern Alberta and it is well worth while to pay a visit to the large colony of them some miles east of Hillcrest. The large game hole to which these strange animals fly when disturbed is a masterpiece of ingenuity, while the large shelter where they most generally congregate is attracting the attention of the master minds in the world of natural history. The hole is placed just over the entrance and is a source of much controversy, while the indescribable scenes witnessed after these strange creatures have paid a protracted visit to this place cause much merriment among visitors. Whether on account of the not unpleasant smells inside or on account of the large circular pots placed at regular intervals on the floor resembling more than anything the polished floor of civilization, these engines of track life are often seen locking forelegs one with another and indulging in the most grotesque antics when leaving. At the time of writing no satisfactory explanation of this peculiar trait has been offered, and future visitors to Guanaco town may confer a great favor on science by making notes of the animal's behavior during their visit, forwarding same to the office of this paper for comparison.

Since their incorporation the Hillcrest Co-operative Society Limited have made their venture a success far and beyond their expectations. They have opened two months or so ago at Hillcrest has attracted so much business that it has been found necessary to treble the original staff in the store to cope with the ever increasing amount of trade. The stock in this Society is held almost entirely by miners and men connected with mines in the towns of Hillcrest, Frank, Bellevue, Lillie, Burnis and Passburg. The directors have been considering the advisability of opening up branch stores in all of these towns and without doubt in time these branches will be established, but at the present time, owing to lack of sufficient capital to firmly establish stores in all of these towns they are directing their considerations upon the opening up of branches in Bellevue and Frank, these towns having a larger number of customers and shareholders of the Society than the others. This their first venture, having proved such a success they are faithful in extending the territory of their trading operations, and we venture to say that within a couple years the Hillcrest Co-operative Society will be one of the largest, best known and most profitable Societies of this kind in the West.

Happenings in and Around Frank

A. I. Blais went out to Fernie on business Monday and returned to town Tuesday evening.

In the entrance examinations Janet Nicol, Alva Blais and Ernest Blais were successful in passing.

A big dance was held by the Bohemians on Monday night, and the wee-wee-wee of Tuesday morning experienced the awakening echo.

Rev. W. T. Young occupied the pulpit of the Bellevue Methodist church on Sunday night last, the service at Knox church being in charge of Adam Lorimer, of Hillcrest.

A double wedding was performed at noon Saturday by the Rev. W. T. Young, when Francisco Macor was united to Annetta Eslyn, and Kinoldi Rivaldo to Carmen Fabbro, the girls being sisters.

Rev. Fr. Sammut presented to Mr. C. Viner a beautiful lady's purse of handmade Maltese lace, nicely lined with pink silk for the best tennis player at the Sanatorium ground. The purse is estimated to cost \$12.

Harry Howe Roberts, who served four years in a London office, and the past year with Harry C. Moore, of this town, has passed successfully in his examination for solicitor. He has not yet been called to the bar, but is to be congratulated on his success.

Sam Wilkinay, the murderer of George Lakator, at Frank, went to his death through the gallows at Macleod on Friday morning last. Only the necessary officials witnessed the hanging. He was accompanied to the scaffold by two priests, without a murmur or statement. The trap was sprung at 7:36 and death was pronounced instantaneous. The usual inquest was held and the remains buried in the jail cemetery at Macleod.

Great preparations have been made for the big convention to be given by the Lethbridge United Commercial Travellers' Association, at the Rocky Mountain Sanatorium, Friday, Saturday and Sunday. On Friday night a grand ball will be given together with supper and refreshments, to which some three or four hundred guests have been invited. The Macleod orchestra will furnish the music. Saturday will witness the opening of the new tennis courts and promises to be of unusual interest. A large number of invitations have been issued to tennis enthusiasts and others, and the management of this popular holiday and holiday resort will put up \$100.00 in ladies' and gents' prizes. Sunday will be occupied in general sociability, the orchestra furnishing music throughout the day. A big dinner will be served, at which it is expected hundreds of Pass citizens as well as the visiting members of the Travellers' Association will be present.

Frank, Bellevue, Lillie, Burnis and Passburg. The directors have been considering the advisability of opening up branch stores in all of these towns and without doubt in time these branches will be established, but at the present time, owing to lack of sufficient capital to firmly establish stores in all of these towns they are directing their considerations upon the opening up of branches in Bellevue and Frank, these towns having a larger number of customers and shareholders of the Society than the others. This their first venture, having proved such a success they are faithful in extending the territory of their trading operations, and we venture to say that within a couple years the Hillcrest Co-operative Society will be one of the largest, best known and most profitable Societies of this kind in the West.

Happenings in and Around Bellevue

Mrs. Andrews Goodwin is spending the week with friends in Fernie.

J. R. Bennett, ex-editor of the District Ledger, was in town on business Saturday.

Alexander McDonald, one of the old-timers of The Pass, was in town on Sunday.

Miss Lily Lewis, of Calgary, is visiting in Bellevue, the guest of Mr. and Mrs. Arnold Martell.

G. W. Goodwin was visiting friends in Fernie on Saturday last and will return this week end.

Rev. W. T. Young, of Frank, occupied the pulpit of the Methodist church on Sunday night last.

Grace V. Bonner, the impersonator and ventriloquist, gave a concert in the Socialist Hall on Thursday night of last week.

James Callan, manager of the Bellevue Hotel, is leaving in the near future for Red Deer, where he is taking charge of a hotel.

Arnold Varley and Ernest Fisher went to North Fork fishing on Saturday, returning home this week with some fine specimens.

Hugh McDonald, James Fisher and James Boyle went to North Fork on Friday night, from where they hope to bring some good fish.

Quite a crowd of sports went to Hillcrest on Thursday night to see the match between Hillcrest and Bellevue. Bellevue were defeated to the tune of 3 to 1.

Were all medicines as meritorious as Chamberlain's Cough, Croupers and Diarrhoea Remedy the world would be the off and the percentage of suffering greatly decreased. Write for a free copy of the booklet. For sale by all druggists.

The ball given in the Socialist hall on Monday night was a grand success. Over one hundred couples attended and pronounced the affair the most enjoyable yet held in Bellevue. Splendid music was furnished by the Pincher Creek orchestra.

The boxing contest slated to be held on Saturday night at the Socialist hall, was witnessed by a crowded house. Two preliminaries were pulled off, the first between two Hillcrest boys, John and Taylor; the second between the well known "star" Dominick Marshall and Thomas Tapella, of Bellevue. Both the prelims were very interesting and elicited considerable applause.

About 10:30 the principals of the main bout—Louis Britano, of San Francisco, Cal., and Freddie Bealle, lightweight champion of Quebec, were introduced to the audience by Sam Granger. The first seven rounds were evenly fought, with exception of the sixth, in which Bealle seemed to have very much the better of his opponent. From the eighth to the twelfth rounds Bealle did the forcing and displayed a great mastery of the pugilistic art. Great applause was forthcoming from the audience right through to the sixteenth round. Several times Britano had to cling to Bealle to save himself from the rain of blows. In the sixteenth round Britano was sent to the floor with a strong left, and took the count. Bealle being announced the winner. All claim that Saturday night's exhibition excelled anything of the kind yet staged in The Pass and it is to be hoped that a bout of a similar class will again be staged in the near future.

A real amount of ill health is due to impaired digestion. When the stomach fails to perform its function properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. It will strengthen your digestion, regulate your stomach, your bowels, entirely doing away with that miserable feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by all dealers.
